For the Quarter Ended 31 March 2023

## 1. OVERVIEW OF RISK MANAGEMENT PROCESSES

### Introduction

First National Bank Botswana Limited (FNBB or the bank), is a subsidiary of First National Bank Holdings (Botswana) (FNBH), (which owns 70% of the bank's issued shares, and 30% are publicly held on the BSE, with no individual holding more than 10% of the issued shares). FNBH is wholly owned by FirstRand EMA Holdings (FREMA), which is wholly owned by FirstRand Limited (SA) (FirstRand Group or the Group).

This Pillar 3 disclosure report is consistent with:

- i. *the Bank of Botswana's Directive on the Revised International Convergence of Capital Measurement and Capital Standards for Botswana (Basel II Directive); and*
- ii. *the Basel Committee on Banking Supervision's (BCBS) Revised Pillar 3 Disclosure Requirements.*

This report has been internally verified by the bank's governance processes in line with the FNBB Pillar 3 Disclosure Policy, which describes the responsibilities and duties of Senior Management and the Board in the preparation and review of the Pillar 3 Disclosure.

It aims to ensure that:

- minimum disclosure requirements of the Regulations are met;
- disclosed information is consistent with how the Board assesses the bank's risk portfolio; and
- the disclosure provides a true reflection of the bank's financial condition and risk profile.

### 1.1 Risk profile analysis

#### Capital adequacy

FNBB has maintained its strong capital position. Capital planning is undertaken on a three-year forward-looking basis. The level and composition of capital are determined considering business units' organic growth plans and stress-testing scenario outcomes. In addition, the Bank considers external issues that could impact capital levels, which include regulatory and accounting changes, macro-economic conditions and outlook.

#### Credit risk

FNBB Credit loss rates are within the risk appetite of FNBB. These are managed within the Credit Risk Management Framework. Credit origination strategies are aligned to the FNBB macroeconomic outlook.

#### Market risk in the trading book

The interest rate risk asset class represents the most significant market risk in the trading book exposure as at 31 March 2023. The bank's Market Risk profile remained within risk appetite. Market Risk was managed within the Board acceptable limits.

#### Regulatory Risk

Over the year, there has been numerous changes in the regulatory landscape, brought by various emerging legislations, which the bank continually assesses their impact and revise the current control environment. Recent changes have included the changes to the Monetary Policy by Bank of Botswana.

## 2. REGULATORY CAPITAL REQUIREMENTS

Consolidation of all group entities for accounting purposes is in accordance with IFRS and for regulatory purposes in accordance with the requirements of the Basel II Regulations.

- There are no differences in how entities are consolidated for accounting and regulatory purposes.
- There are no restrictions, or other significant impediments, to the transfer of funds or regulatory capital within the group.
- No capital deficiencies in any of the subsidiaries are not included in the consolidation for regulatory purposes.

The capital planning process ensures that the total capital adequacy and Common Equity Tier 1 (CET1) capital ratios remain within or above targets across economic and business cycles. Capital is managed on a forward-looking basis, and the Bank remains appropriately capitalised under a range of standard and severe stress scenarios, which includes ongoing regulatory developments, expansion initiatives and corporate transactions. The Bank aims to back all economic risk with loss-absorbing capital and remains well-capitalised in the current environment.

The currency used in this report is Pula, and the lowest denomination used is thousand (P'000).
