# BASEL PILLAR 3 DISCLOSURE

For the Quarter Ended 31 December, 2018

## 1. OVERVIEW OF RISK MANAGEMENT PROCESSES

### Introduction

First National Bank of Botswana Limited (FNBB or the Bank) is a subsidiary of FirstRand EMA Holdings (Pty) Ltd (FREMA). FREMA is a wholly owned subsidiary of FirstRand Limited (FirstRand or the Group).

This Pillar 3 disclosure report is consistent with:

- i. *the Bank of Botswana's Directive on the Revised International Convergence of Capital Measurement and Capital Standards for Botswana (Basel II Directive); and*
- ii. *the Basel Committee on Banking Supervision's (BCBS) Revised Pillar 3 Disclosure Requirements.*

This report has been internally verified by the Bank's governance processes in line with the FNBB Pillar 3 Disclosure Policy, which describes the responsibilities and duties of Senior Management and the Board in the preparation and review of the Pillar 3 Disclosure.

It aims to ensure that:

- minimum disclosure requirements of the Regulations, Standards and Directives are met;
- disclosed information is consistent with the manner in which the Board assesses the Bank's risk portfolio; and
- the disclosure provides a true reflection of the Bank's financial condition and risk profile.

### 1.1 Risk profile analysis

#### Capital adequacy

FNBB has maintained its strong capital position. Capital planning is undertaken on a three-year forward-looking basis and the level and composition of capital is determined taking into account business units' organic growth plans and stress-testing scenario outcomes. In addition, the bank considers external issues that could impact capital levels, which include regulatory and accounting changes, macro-economic conditions and outlook.

#### Credit risk

FNBB Credit loss rates are within the risk appetite of FNBB. These are managed within the Credit Risk Management Framework. Credit origination strategies are aligned to the FNBB macroeconomic outlook.

#### Market risk in the trading book

The Interest Rate Risk asset class represents the most significant Market Risk in the trading book exposure as at 31 December 2018. The bank's Market Risk profile remained within risk appetite. Market Risk was managed within the Board acceptable limits.

## 2. REGULATORY CAPITAL REQUIREMENTS

Consolidation of all FNBB Group entities for accounting purposes is in accordance with IFRS, and for regulatory purposes in accordance with the requirements of the Basel II Regulations. There are no differences in the manner in which entities are consolidated for accounting and regulatory purposes.

There are no restrictions, or other major impediments, on the transfer of funds or regulatory capital within the FNBB Group. There are no capital deficiencies in any of the subsidiaries that are not included in the consolidation for regulatory purposes.

The capital planning process ensures that the total capital adequacy and Common Equity Tier 1 (CET1) capital ratios remain within or above targets across economic and business cycles. Capital is managed on a forward-looking basis. The Bank remains appropriately capitalised under a range of normal and severe stress scenarios, which includes ongoing regulatory developments and expansion initiatives and corporate transactions. The Bank aims to back all economic risk with loss absorbing capital and remains well capitalized in the current environment.

The currency used in this report is Pula and lowest denomination used is thousand (P'000).
